

Proposed amendment number 1 to 07 LSO 0129.W2

This amendment would remove the requirement that four years of math be taken in grades 9-12. The same four levels of math specified in the bill would be required, but the amendment would allow a student to take Algebra I and the other courses specified in eighth grade or even earlier. The student would not be required to take four additional years of math in grades 9-12. The limited exception to the "4 years in grades 9-12," which is currently in the bill, is removed as unnecessary.
