### Wyoming Funding Model Groundskeeper Resources

During the administration of the Wyoming funding model, the Wyoming Department of Education (WDE) has discovered that there is a large inequity in the way groundskeepers are resourced. The inequity comes from what sites are allowed to generate groundskeeper resources.

#### Currently

- The groundskeeper's formula is mainly based on the acreage of each district site that is reported to the School Facilities Commission.
- The way the current formula operates allow for districts that have large plots of undeveloped or non-educational pieces of land to generate groundskeeper resources.
- Sites reserved for potential new schools generate groundskeeper resources.
- The WDE cannot address this inequity without a change in the current law.

#### Next

The WDE is asking the Joint Education Interim Committee if they would like to address the inequity and if so, by what means and when?

Attached is spreadsheet depicting the amount of groundskeeper resources available to each school district in the 2006-07 and 2007-08 school years. The highlighted districts are districts, to the best of the WDE's knowledge, that have land that is either undeveloped, not currently used for educational purposes, or have sites for potential new schools.
