**21-13-309. Determination of amount to be included in foundation program for each district.**

(m) In determining the amount to be included in the foundation program for each district, the state superintendent shall:

(iv) Based upon reports from each district on schools operating within that district for the current school year and on grade configurations contained within each reported school during that school year, compute the average daily membership (ADM) for each reported school and each grade within each reported school in accordance with identified grade configurations subject to the following:

(A) Except as otherwise provided in this subparagraph, if the district's average ADM for the three (3) immediately preceding school years is greater than the district's ADM from the previous school year, each reported school shall be computed based upon the average of the school's ADM counts completed at the end of the three (3) immediately preceding school years, otherwise each reported school within the district shall be computed based on the school's ADM for the previous school year. For school year 2021-2022, to address impacts from COVID-19, each reported school shall be computed based upon the school's ADM for the 2019-2020 school year;

(v) Based upon ADM computations and identified school configurations within each district pursuant to paragraph (iv) of this subsection, compute the foundation program amount for each district as prescribed by the education resource block grant model adopted by the Wyoming legislature as defined under W.S. 21-13-101(a)(xiv), as contained within the spreadsheets and accompanying reports referenced under W.S. 21-13-101(a)(xvii). The following criteria shall be used by the state superintendent in the administration of the education resource block grant model:

(C) Salaries for all school and district level staffing categories, including teachers, principals and assistant principals, central office administrators, secretarial and clerical staff, operations and maintenance staff and aides and media technicians, shall be based upon average statewide salary levels calibrated under "Attachment A" for each staffing category, adjusted under subsection (o) of this section, including the experience, education and responsibility level as appropriate and as computed for each staffing category. The statewide average for each staffing category shall be adjusted for each district based upon the district experience, education and responsibility level relative to the statewide average for that category. District experience, education and responsibility level by appropriate staffing category shall be updated each year such that district adjustments reflect the prior school year staffing information. Except as otherwise provided in this subparagraph, the district adjusted average salary for each staffing category shall be further adjusted for regional cost differences as measured by the greater of the hedonic wage index or the Wyoming cost-of-living index computed by the division of economic analysis, department of administration and information, with a minimum of one hundred (100) index value, as prescribed by the education resource block grant model. For purposes of the education resource block grant model,

the version of the Wyoming cost-of-living index used by the division shall be based upon the unrecalibrated housing cost index weights unless otherwise determined by the legislature based upon recommendation of the joint education interim committee. In addition, the version of the Wyoming cost-of-living index applied under this subparagraph for any school year shall be the average of the six (6) consecutive semi-annual index reports completed by January 1 of the immediately preceding school year. For school year 2021-2022 the adjustments for regional cost differences under this section shall be measured by the hedonic wage index computed during the 2020 recalibration of the education resource block grant model;

(p) Except as otherwise provided by law and following the computation and application of any adjustment under subsection (o) of this section, the amount computed for each school within each district shall be combined with the amount computed and provided on a district level for that district, as prescribed by the education resource block grant model, to determine the foundation program amount for each district. For school year 2021-2022 any amount computed for teachers shall be provided as a categorical grant outside of the block grant. The categorical grant shall not be expended for any other purpose. Categorical grant funds under this paragraph that are unexpended and unencumbered at the end of the 2021-2022 fiscal year shall revert to the school foundation program account.

**21-13-320. Student transportation; amount within school foundation program formula for transportation maintenance and operations expenditures and school bus purchases; district reporting requirements.**

(a) The amount provided for the transportation of school children within the education resource block grant model pursuant to W.S. 21-13-309(m)(v)(E)(I) shall be computed in accordance with this section. For school year 2021-2022 the amount provided for transportation under this section shall not exceed ninety percent (90%) of the amount expended in school year 2018-2019, excluding any reimbursement for vehicle expenditures under subsections (b) and (g) of this section.

(b) W.S. 21-13-309(m)(v)(F)(II), (III) and by creating a new subdivision (IV) as amended by 2020 Wyoming Session Laws, Chapter 80, Section 334 is amended to read:

**21-13-309. Determination of amount to be included in foundation program for each district.**

(m) In determining the amount to be included in the foundation program for each district, the state superintendent shall:

(v) Based upon ADM computations and identified school configurations within each district pursuant to paragraph (iv) of this subsection, compute the foundation program amount for each district as prescribed by the education resource block grant model

adopted by the Wyoming legislature as defined under W.S. 21-13-101(a)(xiv), as contained within the spreadsheets and accompanying reports referenced under W.S. 21-13-101(a)(xvii). The following criteria shall be used by the state superintendent in the administration of the education resource block grant model:

(F) Amounts provided within the model for health insurance shall be based upon:

(II) The annualized state contribution rate as of January 1 of the preceding school year, on behalf of each employee and official enrolled in the state group health insurance plan, for employee only, split contracts, employee plus spouse or children and family coverage except as provided in ~~subdivision (III)~~ subdivisions (III) and (IV) of this subparagraph; ~~and~~

(III) For school year 2020-2021 ~~and school year 2021-2022~~, the amount provided to a school district for health insurance shall be calculated using the annualized state contribution rate as of January 1, 2019 for employee only, split contracts, employee plus spouse or children and family coverage based on district weighted actual participation in district health insurance plans for the 2018-2019 school year, plus additional funding as calculated pursuant to 2020 Senate File 0001, Section 334(b) as enacted into law. ~~;~~ and

(IV) For school year 2021-2022 the annualized state contribution rate for employee only, split contracts, employee plus spouse or children and family coverage based on district weighted actual participation in district health insurance plans shall be multiplied by the lesser of the number of school district employees funded within the education resource block grant model that are actually enrolled in a school district health insurance plan for the preceding school year or the number of positions funded within the education resource block grant model.

**Section 340.**

(a) There is appropriated ten million dollars (\$10,000,000.00) from the legislative stabilization reserve account to the governor's office to fund research grants and contracts related to carbon capture, utilization and storage, including coal power plant retrofit and other carbon capture, utilization and storage applications. The funds shall be expended only in accordance with the requirements of this section. Any expenditure shall be conditioned upon a match of funds in the ratio of one dollar (\$1.00) of appropriated funds to not less than one dollar (\$1.00) of matching funds from the applicant. The Wyoming energy authority shall seek applications for funding under this section, evaluate each application received and submit any recommendation for funding to the University of Wyoming's energy resources council. Upon receipt of the council's positive recommendation the authority shall submit its recommendation and a proposed agreement, approved as to form and content by the attorney general, to the governor's office. Upon receipt of a recommendation by the Wyoming energy authority, the governor's office may enter into an agreement with the applicant and expend funds under this section if the governor determines the proposal has a reasonable likelihood of:

(i) Increasing the knowledge base within the state of Wyoming on the capture, sequestration and management of carbon emissions from coal fired power plants or other carbon based power generating sources with the potential benefit of improving the future marketability of Wyoming carbon based energy sources;

(ii) Increasing the national and international exposure of the state of Wyoming and its institutions, instrumentalities and political subdivisions as participants and locations for innovation in the use of carbon based energy and carbon capture, utilization and storage applications;

(iii) Adding ancillary or supplemental value to Wyoming products or by-products; or

(iv) Inducing the development of methods or products which may advance the future use of Wyoming carbon based natural resources.

(b) The attorney general and University's energy resources council shall consult with the Wyoming energy authority regarding applications and contents of any agreement to be executed under this section at such times and in a manner as the entities determine to be most efficient to accomplish the purposes of this section.

(c) Notwithstanding W.S. 9-2-1008, 9-2-1012(e), 9-4-207 or any other provision of law, funds appropriated under this section:

(i) Shall not be transferred or expended for any other purpose;
